the 1990s, the number of firms in the industry has increased from 10 to 15.

As a result of the increase in the number of firms, the industry has become more competitive. This has led to a decrease in the price of the product from \$100 to \$80. The decrease in price has led to an increase in the quantity demanded from 100 to 150.

The increase in the number of firms has also led to an increase in the total output of the industry. The total output has increased from 100 to 150. This increase in output has led to a decrease in the average cost of production from \$100 to \$80.

The decrease in the average cost of production has led to an increase in the profit of each firm. The profit of each firm has increased from \$0 to \$20. This increase in profit has led to an increase in the total profit of the industry from \$0 to \$300.

The increase in the total profit of the industry has led to an increase in the investment in the industry. The investment in the industry has increased from \$0 to \$300. This increase in investment has led to an increase in the total output of the industry from 100 to 150.

The increase in the total output of the industry has led to a decrease in the price of the product from \$100 to \$80. This decrease in price has led to an increase in the quantity demanded from 100 to 150.

The increase in the quantity demanded has led to an increase in the total revenue of the industry from \$10,000 to \$12,000. This increase in total revenue has led to an increase in the total profit of the industry from \$0 to \$300.

The increase in the total profit of the industry has led to an increase in the investment in the industry from \$0 to \$300.

The increase in the investment in the industry has led to an increase in the total output of the industry from 100 to 150. This increase in output has led to a decrease in the average cost of production from \$100 to \$80.

The decrease in the average cost of production has led to an increase in the profit of each firm from \$0 to \$20. This increase in profit has led to an increase in the total profit of the industry from \$0 to \$300.

The increase in the total profit of the industry has led to an increase in the investment in the industry from \$0 to \$300. This increase in investment has led to an increase in the total output of the industry from 100 to 150.

The increase in the total output of the industry has led to a decrease in the price of the product from \$100 to \$80. This decrease in price has led to an increase in the quantity demanded from 100 to 150.

The increase in the quantity demanded has led to an increase in the total revenue of the industry from \$10,000 to \$12,000. This increase in total revenue has led to an increase in the total profit of the industry from \$0 to \$300.

The increase in the total profit of the industry has led to an increase in the investment in the industry from \$0 to \$300. This increase in investment has led to an increase in the total output of the industry from 100 to 150.

The increase in the total output of the industry has led to a decrease in the price of the product from \$100 to \$80.
